UX and Front-End Web Designer and Developer

About Me

With a background in philosophy and literature and a love for technology, I am a creative and critical thinker who enjoys building interactive, informative and emotive digital experiences to improve the lives of others.

I am confident researching and writing for projects while persevering through problems by learning new techniques and solutions.

Experience

2022

- 10/21 - 2022
Developing "Frome Valley Digital Trails" web application for the Winterbourne and Frome Valley Environmental Group - a local organisation tackling climate change at a local level.
The project consisted of developing a digital trails webapp displaying routes and information accessible via QR codes.
As part of this experience I learnt Tailwind CSS, coding for a client and creating handover documentation (<https://winterbourne-environmental.uk/>)
- 10/21 - 2022
Designing and developing a custom virtual museum webapp prototype for my final year university project.
I learnt to use React JS, Three JS, React-Three-Fiber and the value of the node package manager.

2021

- 2/21 - 05/21
For my User Experience module at university, I designed a hi-fidelity mobile prototype in collaboration with Fruto Studio Oxford. (<https://frutostudio.co.uk/>)
I learnt about and enacted the UX workflow including User Interviews, Personas, SWOT, Figma prototyping etc.
- 06/21 - 11/21
I designed, developed and maintained a live website blog tracking public test server changes for the as of then upcoming expansion for the MMORPG "Star Wars The Old Republic".
I gained valuable insight into copywriting and journalism for the web and the importance of designing relevant information flows.

Education

University of the West of England

BSc (Hons) Digital Media
September 2018 - May 2022

Deans award for academic excellence 2021

Primarily technical / practical degree focused on the creation of digital content (web development, creative coding, media production, user experience)
